Projects

Sociagram: **LIVE** | **git**

Full-Stack web app inspired by the popular app Instagram (Desktop)
- Encrypted backend using BCrypt gem to encrypt user's password
- Stored attachments and uploaded materials utilizing Paperclip gem and Amazon Web Services for new post and user avatar images
- Integrated React.js for building user interface and kept track of states for each post or any new or deleted comments.

Wild World: **LIVE** | **git**

Three years of experience using JavaScript and HTML/CSS
Tower Defense inspired game built with JavaScript and Canvas
- Drew images on Canvas and added event listeners to simulate interactivity
- Animation and redrawing of images through requestAnimationFrame

SolDataAssociation: **git**

An Object-Relational mapping project used to associate models inspired by ActiveRecord
- Easier manipulation of the database by including insert, update, fetch, execute, and save actions that are functionally similar to SQLite3's commands

Two more projects: *Profile Creator* (Django) **LIVE** and *League Watch* (React.js) **LIVE**

Skills

Ruby	Ruby on Rails	Python	Django	Bootstrap
JavaScript ES6	jQuery	AWS	React.js	Redux
MongoDB	SQL	HTML5/CSS3	Linux	Node.js

Education

App Academy   2017
- Rigorous web development program, including over 1000 hours of coding with less than 3 % acceptance rate.
- Program emphasizes pair programming, TDD, RESTful API, and OOP.

Queens College   2015
- Bachelors of Science in Biochemistry

Employment

NYC Department of Environmental Protection   June 2006 - Oct 2010
