Projects

Sociagram: **LIVE** | **git**

Full-Stack web app inspired by the popular app Instagram

- Encrypted backend using BCrypt gem to encrypt user's password
- Stored attachments and uploaded materials utilizing Paperclip gem and Amazon Web Services for new post and user avatar images
- Integrated React.js for building user interface and kept track of states for each post or any new or deleted comments.

SolDataAssociation: **git**

An Object-Relational mapping project used to associate models inspired by ActiveRecord

- Easier manipulation of the database by including insert, update, fetch, execute, and save actions that are functionally similar to SQLite3's commands

Wild World: **LIVE** | **git**

Tower Defense inspired game built with JavaScript and Canvas

- Drew images on Canvas and added event listeners to simulate interactivity
- Animation and redrawing of images through requestAnimationFrame

---

Skills

Ruby	Ruby on Rails	Python	Django	Bootstrap
JavaScript	jQuery	React.js	Redux	SQL
MongoDB	HTML5/CSS3			

Education

App Academy   2017

- Rigorous web development program, including over 1000 hours of coding with < 3 % acceptance rate.
- Program emphasizes pair programming, TDD, RESTful API, and OOP.

Queens College   2015

- BS in Biochemistry
